INTRODUCTION LETTER

Dear Sir,

Mabu - Pressen, managed is an innovative medium - sized company with international orientation.

Our company was founded in 1898 and can thus be proud of a 100 years tradition. We have been building mechanical presses and high - speed precision since 1948 - i.e. for more than 50 years.

Our modern range includes precision presses with a **pressing force from 120kn to 1.000 kn maximum**, with **conventional or CNC controls**, with speeds of up to, 1,000 strokes per minute.

For more details please take a look at our homepage (German / English / French).

More than 12.000 machines are installed all over the world.

Our precision presses are used in non - cutting industries in the range of punching, Cutting, bending, stamping and complicate operations of follow - up composite tools and compound dies.

The high precision presses are working with a proven knee - lever - technology with patented stroke setting.

Mabu CNC - Automatic - Precision - presses satisfy customer's needs with the **advantages of quick, precise and reproducible change** - overs afforded by the modern industrial PC - control system utilized.

The customer's option we will deliver the presses with all needed peripheral device like mechanical or CNC - feeder, die cutting tool, measuring equipment, etc.

As a manufacturer in the range of machine construction we possess about great experience and flexibility for difficult and challenging duties and responsibilities for the customers.

We offer you prompt and efficient service backup through our agent:
